Course content

The satisfactory completion of this course has three elements;

- Essential skills (defibrillator safety, demonstration of BLS, knowledge of the VF& pulseless VT ALS algorithms, and the ability to perform rapid cricothyrotomy).
- Secondary skills which should all be covered once over a period of three years.
- A selection of discussion based scenarios which should all be covered at least once every three years.

All the following scenarios and skills were satisfactorily practised.

- | | |
|----------------------------------|--------------------------|
| 1. Defibrillator safety | <input type="checkbox"/> |
| 2. BLS | <input type="checkbox"/> |
| 3. VF/Pulseless VT ALS algorithm | <input type="checkbox"/> |
| 4. CICV/cricothyrotomy | <input type="checkbox"/> |

A selection of the following scenarios was satisfactorily practised.

- | | |
|-------------------------|--------------------------|
| 1. Asystole | <input type="checkbox"/> |
| 2. Bradycardia & pacing | <input type="checkbox"/> |
| 3. PEA | <input type="checkbox"/> |

Two or more of the following scenarios were discussed.

- | | |
|-----------------|--------------------------|
| 1. MH | <input type="checkbox"/> |
| 2. Eclampsia | <input type="checkbox"/> |
| 3. Hyperkalemia | <input type="checkbox"/> |
| 4. Tachycardias | <input type="checkbox"/> |
| 5. Bronchospasm | <input type="checkbox"/> |
| 6. | <input type="checkbox"/> |
